

VACANCY

JOB TITLE: Operator & finisher

Broanmain are technical trade moulders, having expertise in many different processes in the plastics industry. Included in these are: Thermoplastic Injection, Vacuum forming, Thermosetting Injection, Compression, and Transfer moulding.

Broanmain, not only supply excellent quality thermosetting and thermoplastic mouldings utilising a variety of machines with capacities up to 250 tons, we also provide tool design, tool manufacturing, printing, assembly, packing and distribution.

We provide our customers with a personal service, drawing from the expertise of our varied and long standing team.

Because we produce both injection and compression mouldings of thermoplastics and thermosetting plastics, we can give our customers unbiased advice on ideal polymer selection, thus providing them with the best solution in quality, performance and cost.

Due to expansion, we have vacancies for enthusiastic and conscientious operators & finishers at or site in Holmwood, Dorking.

Primarily responsible for performing finishing operations including pad printing, assembly, running of machines and producing good quality mouldings.

Working in teams a flexible can-do approach is essential.
